

1. Supplier

Company: Dijkstra Plastics B.V.

Address: Industriestraat 30-34 Haaksbergen

Contact: +31 53 572 38 84

Role within PPWR: supplier

2. Product Family Identification

Product family: **F1**

Product description: Transparent buckets and lids for food and nonfood applications unprinted with a steel handle.

Material(s): **Virgin PP (Polypropylene)**

Packaging application: Primary / Secondary / Tertiary

3. Scope

This declaration applies exclusively to the above-mentioned product family supplied by Dijkstra Plastics B.V.

The declaration is based on the product formulation, intended manufacturing process, supplier documentation, raw material specifications and the PPWR Article 5 Risk Assessment forming part of the technical documentation maintained by Dijkstra Plastics B.V.

4. Declaration

Dijkstra Plastics B.V., as a supplier of packaging, declares that the above product family has been assessed against the applicable substance-related requirements of Regulation (EU) 2025/40 (PPWR).

The assessment demonstrates compliance with:

- *Article 5(1) – Minimization of substances of concern:* ^{*}
 - Article 5(4) – Combined concentration limit for lead, cadmium, mercury and hexavalent chromium.
 - Article 5(5) – PFAS requirements (where applicable)
 - Commission Regulation (EU) 2024/3190 – BPA and other hazardous bisphenols (food contact products where applicable).

5. Basis for Compliance

Compliance has been demonstrated using a documented risk-based conformity assessment including:

- Formulation review
- Supplier qualification
- Supplier declarations
- Raw material specifications

^{*} At present, we have the minimum supporting documentation required to comply with the applicable obligations.
Together with our suppliers, we will continue to expand, verify, and update the available declarations and supporting documentation.

- Purchasing specifications
- Certificates of Conformity (CoC) and/or Certificates of Analysis (CoA)
- Technical documentation for intermediate materials (including IMLs)
- Internal manufacturing controls
- Risk-based analytical verification

The detailed methodology and supporting evidence are documented in the PPWR Article 5 Risk Assessment, which forms part of the technical file for this product family.

6. Technical Documentation

The technical file includes where applicable:

- PPWR Article 5 Risk Assessment
- Raw material specifications
- Supplier declarations
- CoA/CoC
- Analytical reports
- Internal procedures
- Change management records

7. Limitations

This declaration relates solely to the packaging supplied by Dijkstra Plastics B.V. Customers remain responsible for assessing the suitability of the packaging for the intended application and compliance of the final packaged product.

8. Validity

This declaration remains valid until changes occur to the formulation, manufacturing process, supplier documentation or applicable legislation, or when new information affecting compliance becomes available.
